

# Videology – The ‘Search By’ module

## Goal

Design a module for our client to target their advertising to internet users based on location.

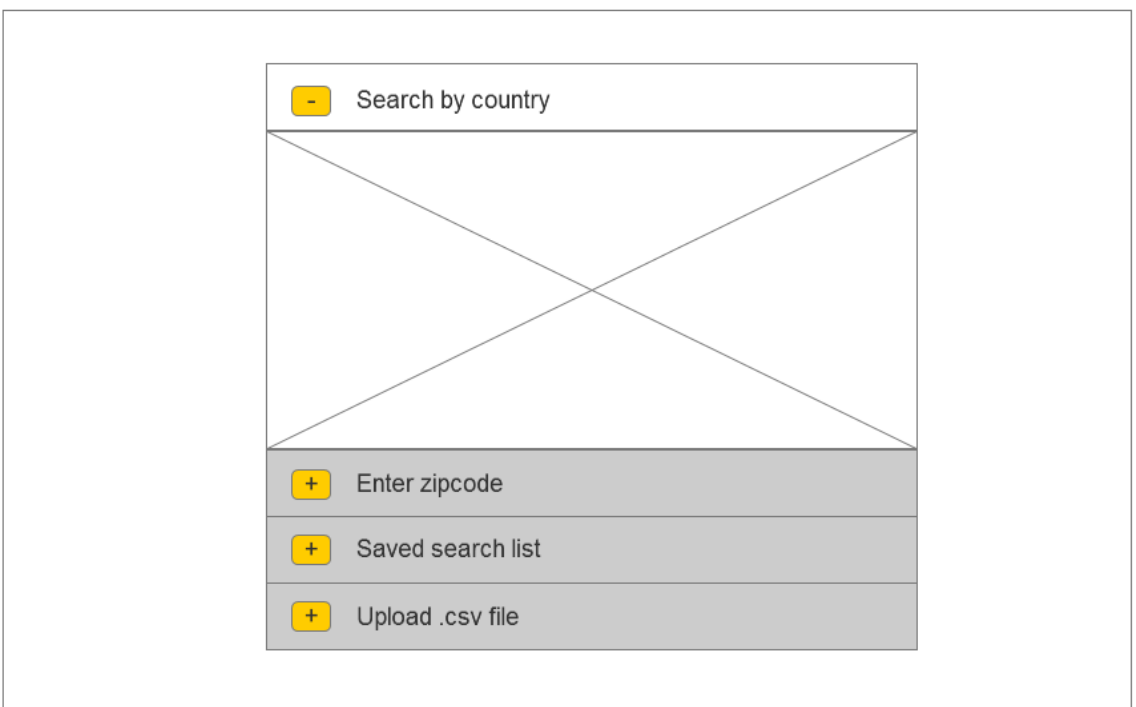

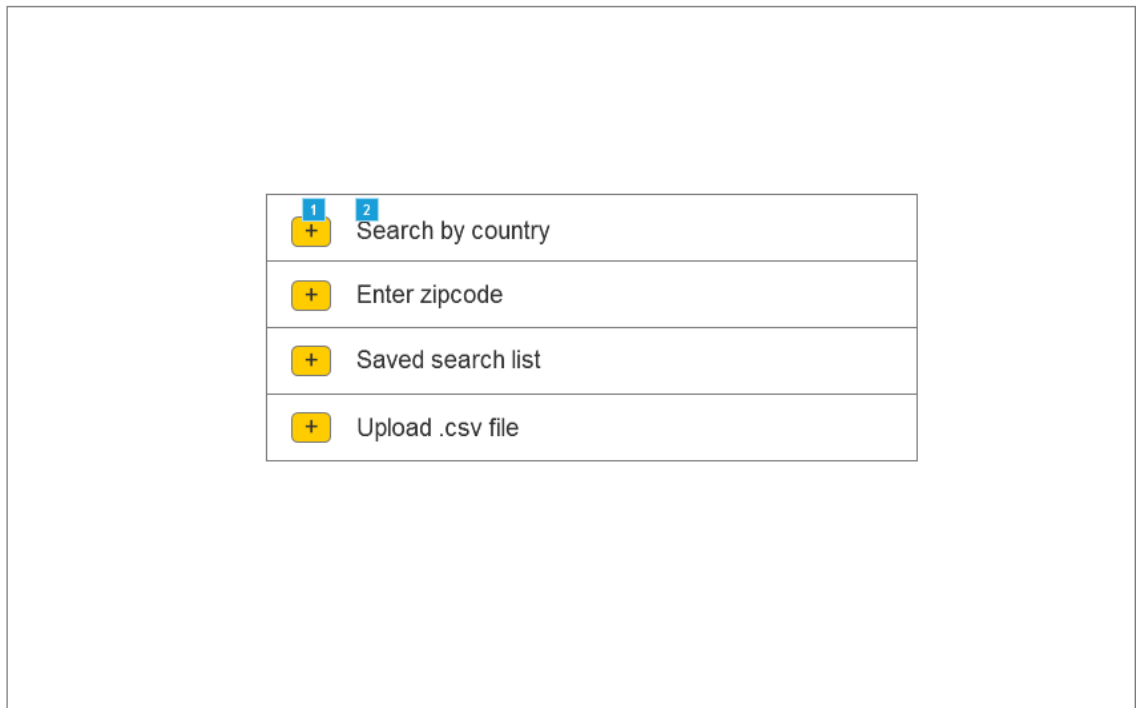

## Flowchart

# Wireframe

## Landing page

Default and on-click design

## Description

Footnote	Name	Description	Type	Enabled/Disabled
1	Accordion button	Used to maximize/minimize between different 'Search by' views.	Button	By default: All 4 are enabled. When one is selected, other 3 gets disabled.
2	Accordion list	Used to maximize/minimize search option(s) tab.	Accordion list	By default: All 4 are enabled. When one is selected, other 3 gets disabled.

## Module 1 – Search by country

Default and on-select design

The image shows the default design of the 'Search by country' form. It features a header with a minus icon and the text 'Search by country'. Below the header, there is a 'Save search' button (1) in the top right corner. The main content area contains a 'Select country' dropdown menu (2) and an 'Add state' text input field (3). A 'Search' button (4) is positioned below these fields. At the bottom, there are three expandable sections: 'Enter zipcode', 'Saved search list', and 'Upload .csv file', each with a plus icon.

The image shows the on-select design of the 'Search by country' form. The 'Select country' dropdown menu (2) is now expanded, showing 'United States' as the selected option. Below it, the 'Add state' text input field (3) is now a dropdown menu (5) showing 'Georgia, Ma\_', 'Maine', and 'Maryland' as options. The 'Search' button (4) remains below the state selection. The bottom expandable sections are still present: 'Enter zipcode', 'Saved search list', and 'Upload .csv file'.

## Description

Footnote	Name	Description	Type	Enabled/Disabled
1	Save search	Saves the current search preference.	Icon button	Enabled when all the required input fields are entered correctly.
2	Select country	Lists the different countries	Drop-down list	Always enabled.
3	Add state	Displays states based on user entry. Simultaneously validates and autocorrects state names.	Text input field	Enabled when the country is selected, else disabled.
4	Search	Performs the search.	Button	Enabled when 'Select country' and 'Add state' have correct values.
5	Prediction list	Displays a predicted list of states based on the user's input.	List box	Enabled when user starts typing in the 'Add state' text input field.

## Module 2 – Enter zipcode

Default and on-entering data design

The image shows the default state of a web form titled "Enter zipcode". The form is contained within a light gray border. At the top, there is a gray header bar with a yellow "+" icon and the text "Search by country". Below this is a white section with a yellow "-" icon and the text "Enter zipcode". The main content area is white and contains a yellow input field with the placeholder text "Enter zipcode" (callout 2), a gray "Search" button (callout 3), and a gray "Save search" button (callout 1). At the bottom, there are two gray footer bars: the first has a yellow "+" icon and the text "Saved search list", and the second has a yellow "+" icon and the text "Upload .csv file".

The image shows the form after the user has entered the zipcode "21227, 21228". The layout is identical to the default state, but the yellow input field now contains the text "21227, 21228". The "Search" button is now yellow, and the "Save search" button is also yellow. The header and footer bars remain gray.

## Description

Footnote	Name	Description	Type	Enabled/Disabled
1	Save search	Saves the current search preference.	Icon button	Enabled when all the required input fields are entered correctly.
2	Enter zipcode	To enter the zip codes.	Text input field	Always enabled
3	Search	Performs the search.	Button	Enabled when 'Enter zipcode' text input field has input values.

## Module 3 – Saved search list

Default and on-select design

## Module 2 – Enter zipcode

In this view the user would just want a space to enter in zip codes manually that they want to target.

Default visual

The form has an orange header bar with the text "- Enter zipcode". Below the header is a light gray area containing a text input field with the placeholder text "Add zipcode". To the right of the input field is a link that says "Save search" with a download icon. Below the input field is a gray "Search" button.

On-entering data visual

The form has an orange header bar with the text "- Enter zipcode". Below the header is a light gray area containing two blue pill-shaped buttons with the text "21227 x" and "21228 x". To the right of these buttons is a text input field with the placeholder text "Add zipcode". To the right of the input field is a link that says "Save search" with a download icon. Below the input field is a link that says "Reset" with a circular arrow icon. Below the input field is an orange "Search" button.

## Module 3 – Saved search list

The client would be presented with a list of saved files that contain zip codes that have previously been created. When they select a file to target, they would see what zip codes are in that list. They have the ability to select multiple files.
